The term mechanics denotes the science which treats of the motion and equilibrium of bodies; its object is to instruct us how to move any given weight with a given power, by the assistance of machines, or otherwise. 2. Matter denotes the substance of which bodies are made. 3. Body signifies a quantity of matter collected into one mass. 4. Space may be considered as extension without bounds; it is immoveable, but penetrable by matter: this is absolute space. Relative space may be considered as the distance between two bodies, or as the portion of absolute space which a body fills. 5. Place signifies that part of absolute space which a body possesses: this is absolute place. Relative place is the space which a body occupies when considered with relation to surrounding objects. 6. When a body continues in the same part of absolute space it is said to be at Rest. 7. When a body is passing successively from one part of space to another, it is said to be in Motion. 8. When a body passes over equal spaces in equal successive portions of time, its motion is called Uniform. 9. If the successive portions of space described by a body in equal successive portions of time continually increase, the motion of the body is said to be Accelerated; and to be RETARDED when those spaces continually decrease. 10. The Velocity, or Celerity of a body, or its rate...
