Not illustrated. 1922 Excerpt: .forerunner of the vast system of overhead trolley lines operated in the United States at the present time. Uncertain and stumbling were those infant projects but the young industry grew, first gradually displacing the old horse and cable drawn cars then as the vitality of a young giant crept through the veins of the early industry it began to reach out for new territory and greater business, until we have electrically driven passenger cars hurrying through the subways of busy cities, moving through the crowded streets, and whirring on the elevated systems of congested business districts. Intcrurban trains carry passengers and express from town to town and even the giant steam locomotive has had to admit his weakness when matched against the new electrics. Electricity has been harnessed to drive so many of the wheels of industry that it is almost impossible to live without coming into direct contact with the fruits of some of its labors; take the most common of things about us; sit down to the evening meal, look at a slice of bread and ask its story, fertile soil tilled by power in which electrical devices played an important part, wheat harvesting machines drawn by tractors which have electrical lighting and ignition systems, wheat threshed by electric power, delivered by truck to great elevators in which electricity furnishes the power for elevating, drying and cleaning the grain. Electric power at the mill ground the wheat into flour, electric power at the bakery...
